Color Mixer Tool

Color Mixer				Design-Lib.Com

Format : Hex | RGB | RGB%

Start Color   **End Color**

#D2B48C   #B8860B

Select Color   Select Color

Steps : 10
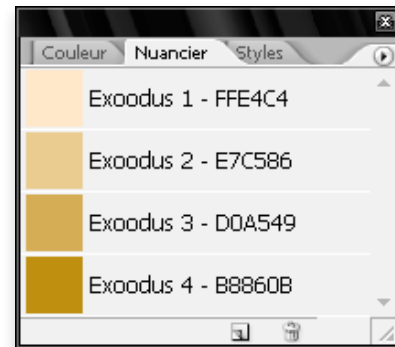

1. #D2B48C
2. #D0B080
3. #CDAC75
4. #CBA769
5. #C9A35D
6. #C69F51
7. #C49B46
8. #C1973A
9. #BF932E
10. #BD8E22
11. #BA8A17
12. #B8860B

You just need four swatches.
In our example, we choose :

Couleur	Nuancier	Styles

Exoodus 1 - FFE4C4

Exoodus 2 - E7C586

Exoodus 3 - D0A549

Exoodus 4 - B8860B

2 - Create your gradients
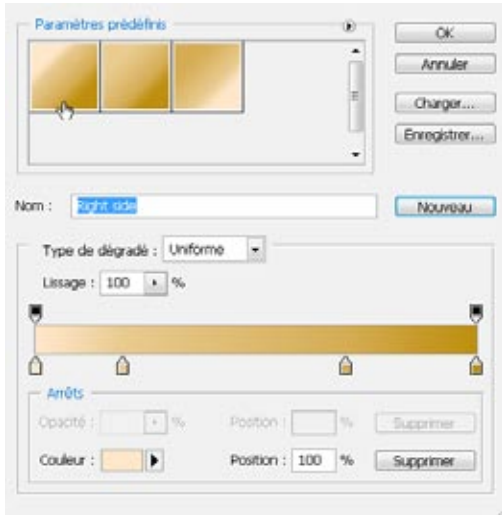

Colors to use and position (%)

#FFE4C4 | 0%

#E7C586 | 20%

#D0A549 | 70%

#B8860B | 100%

Colors to use and position (%)

#E7C586 | 0%

#D0A549 | 70%

#B8860B | 100%

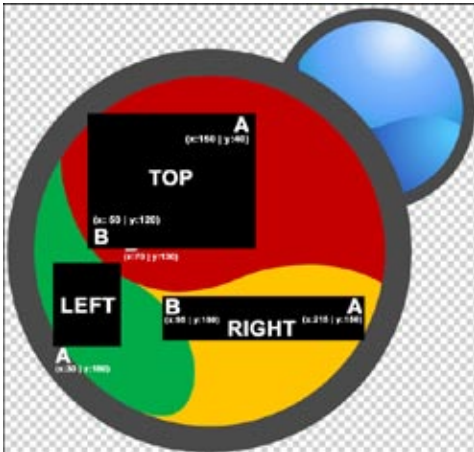

Colors to use and position (%)
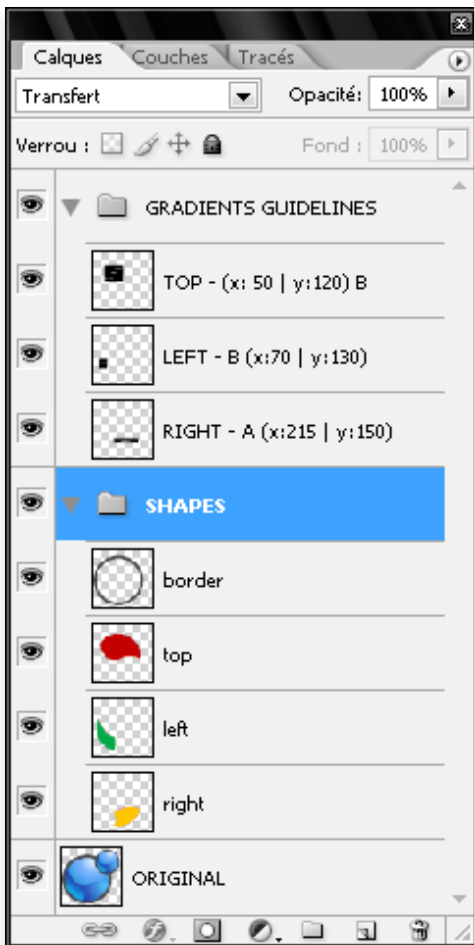

#FFE4C4 | 100%

#E7C586 | 70%

#D0A549 | 0%

3 - xoops-logo.psd file

Logo is ready for customization :
you just have to add your own gradients
over 3 shapes Top, Left and right.

Black shapes contain benchmarks A and B
to position your gradient tool

Colored shapes to fill with your gradients
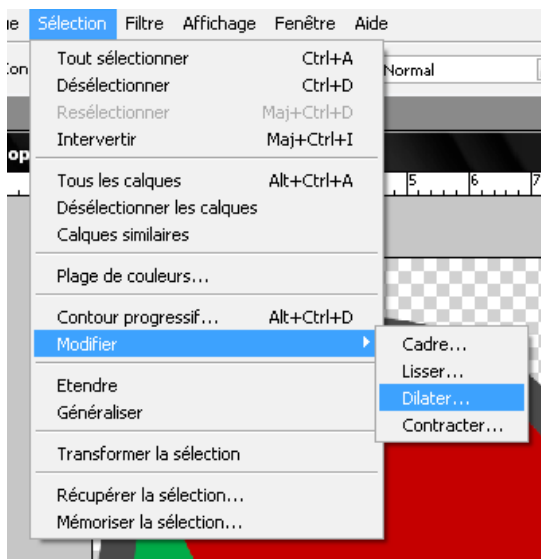

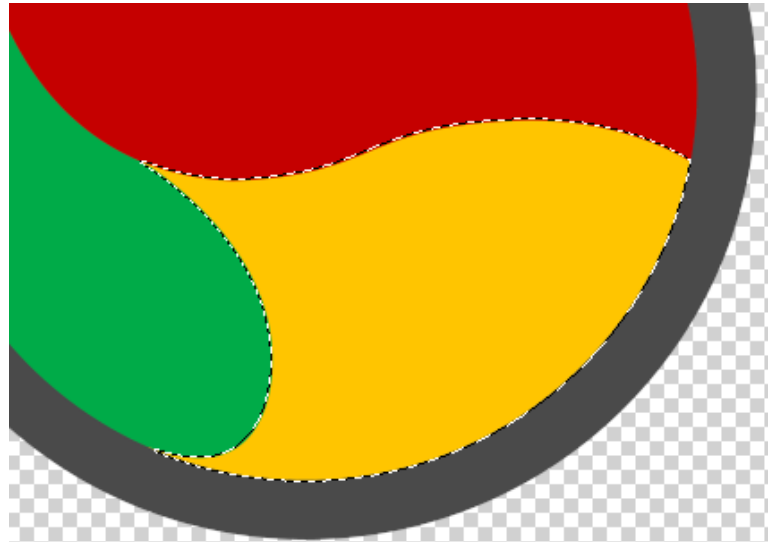

Original Xoops logo, just to compare
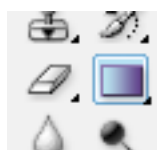

4 - Common procedures

To select a shape
1. Select a layer
2. Place your mouse cursor over thumb
3. Press CTRL + mouse click at the same time
4. Shape is selected

To enlarge a selection
1. Keep selection active
2. Add 2 pixels
3. Your gradient will have no border
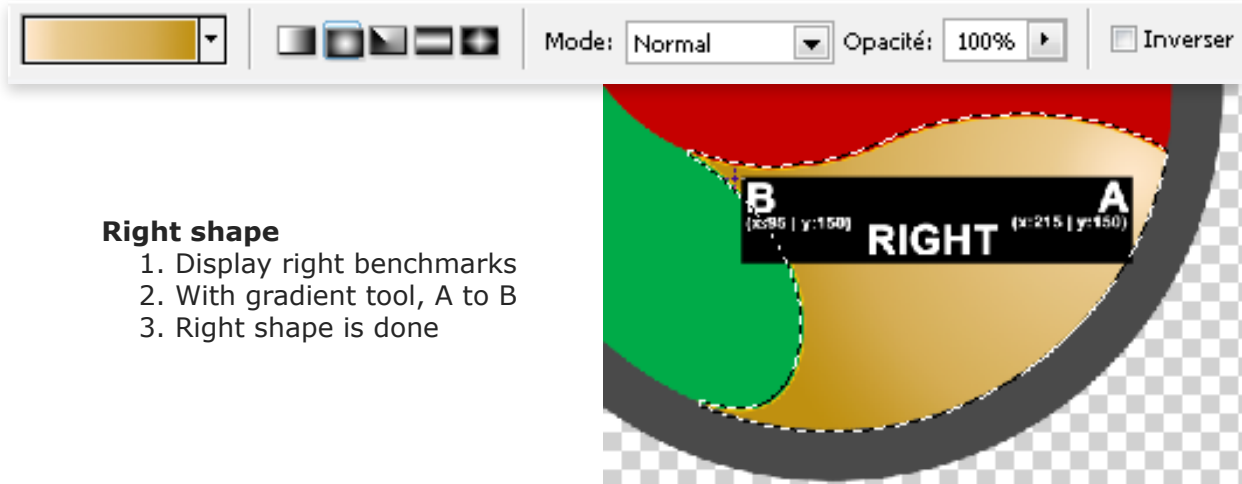

To select a gradient
1. Select gradient tool
2. Choose appropriate gradient (right, left or top)
3. You are ready to fill shape with a gradient
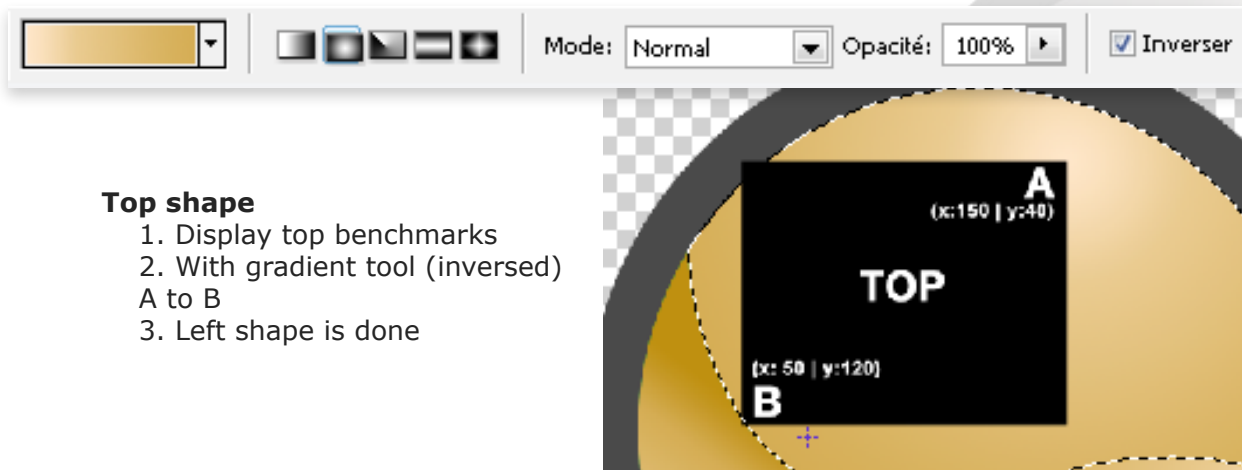

5 - Fill shapes with gradients

Right shape
1. Display right benchmarks
2. With gradient tool, A to B
3. Right shape is done

Left shape
1. Display left benchmarks
2. With gradient tool, A to B
3. Left shape is done

Top shape
1. Display top benchmarks
2. With gradient tool (inversed) A to B
3. Left shape is done

## 6 - Create little bubble

Display Guidelines :
CTRL + **:**

Duplicate layers :
selection and right-click

Merge new layers :
CTRL + **E**

Transform and place it :
CTRL + T

Done !
